Allowable Subject Matter

1. Claims 1-24 are allowed.

2. The following is an examiner's statement of reasons for allowance:

Melvin (US Pat. Pat. 6,067,619) discloses a network device 11 including a plurality of ports 14 that are sampled by a status sampler 26 that determines the communication activity occurring at a respective connection port. The mode controller 23 is then able to receive port activity information from the sampler 26 and transmit activity signals to LEDs 13 to actuate the LEDs to light momentarily, and then turn off, confirming to the user that activity of the ports is being detected. A controller that receives port activity level from a status sampler 26, the signal is received by the sampler and processed to determine which LEDs should be illuminated (col. 3, lines 14-63). However, Melvin nor any prior art of record disclose the claimed controller disposed in a network component and operable to receive an activity level of a port from a processor and generating a signal that is related to the activity level.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
